

Dr Simon Burnell
Head of Diagnostics, Cambridge Consultants

Simon works at Cambridge Consultants as a Commercial Director and leads the diagnostics group in the Medical Technology Division. This group contains the senior client and project managers of Cambridge Consultants healthcare business covering the areas of diagnostic instrumentation, drug delivery and medical technology. Simon is a highly motivated and experienced business leader. Since joining Cambridge Consultants in 2005 Simon has developed the medical diagnostic group to help its clients develop class leading medical diagnostic products. By delivering successful product design and development across the medical diagnostics industry, our global clients have enjoyed sustained success. Our work embraces large clinical laboratory systems, through to Point-of-Care and consumer diagnostics.

In addition, Simon has developed a range of diagnostics products from home cardiac monitors to micro-fluidic systems and clinical analysers. Simon has a strong engineering background and is a Chartered Engineer, holds a PhD from the University of Cambridge and a 1st Class degree in Engineering.
