

JEFFREY D. HILLMAN

Jeffrey D. Hillman attended the University of Chicago, where he was awarded a Trustee scholarship and membership in Phi Beta Kappa for his academic achievements. He graduated with honors from the Harvard School of Dental Medicine, and then earned a doctor of philosophy (PhD) degree in Molecular Genetics from the Harvard Medical School.

Dr. Hillman served on the faculty of the Forsyth Research Institute and the Harvard School of Dental Medicine for 15 years, and then on the faculty of the University of Florida College of Dentistry for 17 years. He is now an emeritus professor at the University and, for the past 8 years, has devoted his full effort to the development of Oragenics Inc. (doing business as ONI BioPharma), a public company he founded to develop replacement therapy and other technologies he invented during his career.

Dr. Hillman holds numerous U.S. and foreign patents for inventions and discoveries that cover a wide range of health-related research, including tooth decay and periodontal (gum) diseases, antibiotics, cancer, weight loss and tuberculosis. Dr. Hillman has been honored for his contributions to dental and microbiological sciences.
